Valencia Slabs guarantee the highest level of technical performance, as they are scratch, ice and heat resistant. The materials are easy to clean and sanitise, as they are non-absorbent and, therefore, food-safe too.

These characteristics, combined with their chromatic stability and UV resistance mean they can be used in outdoor contexts too.

Non-Slip Surface

Designed for stability, stoneware offers superior slip resistance, ensuring safety in both residential and commercial spaces. Its textured surface provides enhanced grip, reducing the risk of slips even in wet conditions.

Heat & Fire Resistant

Stoneware offers exceptional fire resistance, withstanding high temperatures without compromising its integrity. This robust material provides a safe and secure environment, making it ideal for both residential and commercial spaces.

Frost Resistant

Engineered for endurance, stoneware remains unaffected by frost and freezing temperatures, making it ideal for outdoor applications. Its low water absorption prevents cracking and damage, ensuring longevity even in the harshest climates.

Acid & Chemical Resistant

Engineered for durability, stoneware stands resilient against chemicals, stains, and everyday wear. Its non-porous surface ensures resistance to acids, alkalis, and household cleaners, making it an ideal choice for kitchens, bathrooms, and high-traffic spaces.

Scratch Resistant

Stoneware offers exceptional durability with its scratch resistant properties, making it the perfect choice for spaces that demand both style and resilience. Its dense, non-porous surface stands strong against daily wear, maintaining its pristine appearance even in high-traffic areas.

UV-Rays Protected

Stoneware is naturally UV protected, ensuring its colors and finish remain vibrant and intact, even when exposed to sunlight over time. Its resistance to UV rays prevents fading, discoloration, and deterioration, making it an ideal choice for both indoor and outdoor applications.
